Hello!

You've been spotted in a 480!

We are a group of Volvo 480 enthusiasts that do our best to have everyone enjoy their Volvo 480 to the fullest! That means not only trying to give you as much information as possible, but also providing ways for you to exchange valuable information with other members. On our website you will find lots of pages containing interesting information and a forum where you can discuss all Volvo 480 related issues with each other.

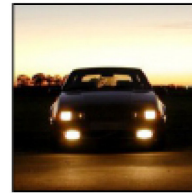

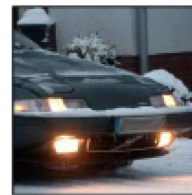

If you join the forum, you'll be joining Europe's friendliest corner of 480 admirers. It's a forum dedicated to technical discussions, information on wheels and suspension, bodywork, and the 480's oh so notorious electrical system. Share stories of your 480 in the General 480 area, or check out the Wastgate for a laugh. Have a problem with your car's idle? Use the search function and check out possible solutions, or take advantage of the site's main page FAQ-where the most commonly asked questions are answered. The forum can cover anything from swapping an engine, to changing a dash bulb! If you have a question, just ask. It's a great forum for pureists and modders alike!

By becoming a member you can also take advantage of club meetings. Meet up with other members, either in your area or at one of the meetings in various other countries!

Being a 480 owner can be a difficult time-but don't give in! The 480 Europe Club is here to help! Registration is free so feel free to come on down and give us a shout! With the 480 becoming a rare sight, it's nice to keep us altogether!

Hopefully see you soon!

Regards
The 480 Europe Team
